USAGE

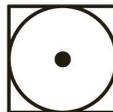

1. Before first use, wash the cloth once in the washing machine.
2. When used dry, it is an ideal duster. Slightly damp, it easily removes dust and dirt even without detergent.
For slightly damp use: Spray an area using a spray bottle or pre-impregnator. For 15 cloths, use 500 ml of water. Place half of the microfiber cloths in a bucket. Add 250 ml of water (with detergent). Place the remaining cloths in the bucket and add 250 ml of water again. The cloths are now clammy for optimal use.
3. Fold the cloth in half 3 times.
4. Use all 16 surfaces, one at a time and change timely.
5. We recommend washing the cloths at 60° C with a detergent for colored fabrics such as Greenspeed detergent. Lower washing temperatures help protect the environment.
